What: 
A 12-week technology venture accelerator program that provides education, 
funding, workspace, guidance and mentoring to early stage technology companies. 
The program will focus on the digital/software companies in its first year and 
expand to support other types of engineering startups in the second year. At the end 
of the summer you pitch your company to a growing network of local and national 
entrepreneurs, investors and alumni.

Partners 
This program was created in collaboration with two of the leading firms in the 
world, Kleiner Perkins Caufield & Byers and United Talent Agency.

Class size: 
The first cohort of the VSi2 incubator will accept 10 companies. Each company has 
to be started by a USC engineering student or alumnus or have an engineering co- 
founder.

Target audience: 
This program is open to anyone as long as you have a USC Viterbi student or 
alumnus as a co-founder or CEO in your team.

Area of Focus: 
Our key focus will be on companies that have a strong technology core. Initially we 
plan on accepting software and hardware based ventures. We eventually plan on 
expanding the program to accept teams from all engineering disciplines.

Stage of company: 
We will accept companies are various stages in the startup lifecycle.

Terms: 
Each team will receive $20K in exchange for 4% equity.

Dates and Duration: (Summer 2013) 
Duration of incubator: May 28th – Aug 16th (12 weeks) 
Demo day: Late August, Mid September 
The incubator will be hosted in Marina del Rey.
