Meet
Terence G. Langdon,
recipient of the
2007 Albert Sauveur Achievement Award from ASM International
(formerly the American Society for Metals)
Terence G. Langdon, professor of aerospace and mechanical engineering, materials science, and earth sciences, is the 2007 recipient of the

Albert Sauveur Achievement Award
from ASM International
(formerly the American Society for Metals)

Langdon, the William E. Leonhard Professor in Engineering in the Viterbi School of Engineering, was recognized for his pioneering research in the processing and properties of ultrafine-grained metals and for other fundamental studies in materials science.
